Learning: Its Nature and Process

The student presenters made a naive, yet profound attempt to explain the concept of learning from a philosophical standpoint substantiating with relevant examples. They elaborated on learning - as Understanding; as Problem-solving; as Experiencing; as Actualizing and as Becoming. The process of learning was discussed in relation to the concepts of teaching and education as a whole. The power-point presentations were made by many students for this purpose. Students were informed about difference in understanding learning from the philosophical and psychological perspectives.

Following students from each section presented their papers in this session as below:
